The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Sutton. Sutton discloses a gas turbine engine (column 4, line 7) that uses a rolling bearing (12) and has a lubrication structure comprising: a lubrication oil hole that radially penetrates through an inner ring of the rolling bearing (col. 3, line 23); an oil accumulating room (chambers 21) of which rotational axis is the same as a rotational axis of the rolling bearing; a lubrication oil supplying path (30) that communicates with the oil accumulating room and the lubrication oil hole; and a fin member (web 20) that is installed in the oil accumulating room. The fin member functions as claimed. With respect to claim 2, the fin member (web 20) extends in a radial direction and an axial direction. With respect to claim 3, there is a plurality of fin members (webs 20) installed at a plurality of positions in a circumferential direction (Figure 2).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
